

# Ambulance with separate compartment

## Standard Installations:

- Strong smooth floor that can be washed without seeping water into the sides or the ground
- Tilted floor to ease cleaning and loading of the stretcher
- Insulating material inserted below the floor to prevent retaining fluids
- The ambulance is painted in red and white
- Ceiling height 2 m (Ford or Chevrolet)
- Wall thickness 5 cm foam
- Possibility of putting 2, 3 or 4 patients (option)

- The word ambulance is written on the sides and back to front on the front of the ambulance
- Steps at the rear and the sides to help the crew load the stretcher
- Most efficient use of internal space
- Partition with sliding window between the driver and the patient cabins.
- Comfortable suspension system suitable for ambulances
- Communication between the patient and driver partitions
- Completely separate patient cabin
- Safe sliding window

## Medical Equipment and Tools:

- Standard height stretcher equipped with mattress and belts
- Curtains on the rear cabin windows or 2/3 height sticker for side windows and 1/2 height for rear window
- Solution stand clamped to the ceiling
- 12 V fan

- Oxygen tank fixed to the floor complete with regulator and mask
- Foldable seat
- Medicine cabinet
- Padded seat for 3 people can also be used for another patient
- Light material stretcher

## First Aid Kit

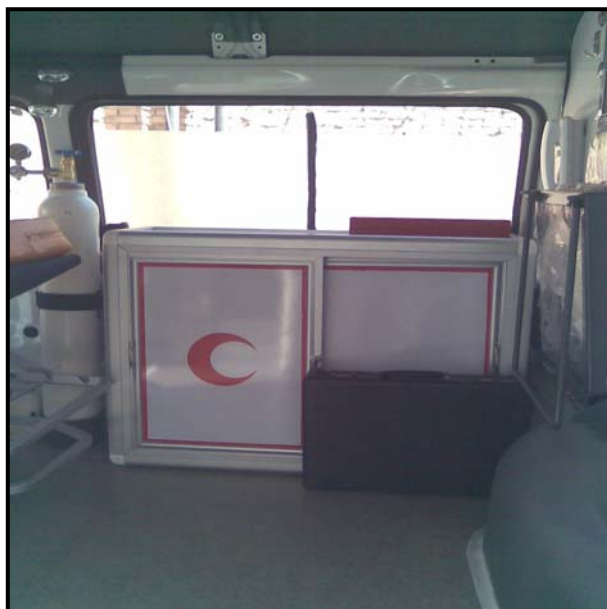

- Complete first aid kit along with splinters, surgical scissors

- Mercury thermometer, stethoscope, medical gauze, bandages, antiseptics, medications, batteries
