

Ladders & steps

Model ESL/06

General:

The fire fighting truck is provided with heavy duty devices to facilitate easy access to the truck roof, the pump room, the side compartment and the crew cabin. They are all from corrosion resistance material hot deep galvanized steel sheets.

1. Rear step:

- At the rear under the pumping room for easy accessibility to any part on it.
- Two men can stand on it and hold the handles to reach the fire location.
- Suitable width for extra firemen to be added to crew. Handles are available for safety.

2. Rear ladder:

- A heavy duty fixed ladder used to facilitate easy access to the truck roof.

3. Side steps:

- There is a foldable step under every compartment. So the fire fighter can reach the top shelf.

4. Crew cab steps:

- A small ladder is fixed under the crew cab to facilitate easy access to it.

5. Movable ladders (optional):

- According to the required specs.
- It has a specific storage location on the truck roof.

Manufacturing & design are according to NFPA.
